**Aim**

To assess the effectiveness, safety and cost-effectiveness of NH<sub>2</sub> Drug Lab (DrugKop) for the detection and screening of illicit substances

**Conclusions and results**

There was no retrievable scientific evidence to support the efficacy of NH<sub>2</sub> Drug Lab (DrugKop) for the detection and screening for illicit substances.

**Methods**

Literatures were searched through electronic databases specifically PubMed/Medline, Cochrane, OVID, INAHTA and also in general databases. Google was used to search as additional web-based information. In addition websites for existing HTA agency, society websites and cross-referencing of the articles retrieved were also carried out accordingly to the topic. A critical appraisal of the retrieved papers was performed and the evidence level was graded according to the US/Canadian Preventive Services Task Force.

**Further research/reviews required**

Clinical research is warranted to provide evidence on the effectiveness for its use.
