

**INSTITUTE OF
HEALTH ECONOMICS**
ALBERTA CANADA

Research Associate Position: Health Technology Assessment

The Institute of Health Economics (IHE) is a vibrant and growing research organization seeking a Research Associate in health technology assessment. IHE projects and services include provincial policy studies and national and international collaborations. As a member of our research team, you will scope, conduct, and present the results of various levels of HTA that will be used to inform health care decision making in Alberta. You may also represent the IHE at various provincial and national conferences.

Our ideal candidate will have a postgraduate education (Masters/PhD) in a health or science related field as well as 2 to 3 years experience in the health sector (government or health research) or an equivalent combination of education and experience. In addition, you possess a broad knowledge of research methods used in the development and application of health technology assessments and in the peer-review process for scientific reports. The ability to work well with multidisciplinary teams that include researchers, information specialists, policy makers, and clinicians, as well as the capacity to succeed in independent research projects are also crucial to success in this role.

As a potential candidate you possess strong project management skills to manage concurrent projects, ensuring goals and deadlines are met and quality levels are maintained. Excellent written and verbal communication skills are also required. A good understanding of the Alberta health care system and knowledge of the decision-making processes within the province would be considered an asset. A commitment to personal learning and development is also highly desirable.

Remuneration is commensurate with qualifications and experience. IHE offers a competitive benefits package.

Please submit your resume by July 31, 2014 to:
